

Technical Production / **Audio Mixers**

Purpose

Audio Mixers are responsible for managing the live mixing of sound during performances to ensure clear, balanced audio. They work to enhance the auditory experience for both performers and the audience, fine-tuning sound elements to fit the event.

Tasks & Responsibilities

- Mix audio live during performances to achieve optimal sound quality
- Work closely with performers to balance their audio requirements
- Collaborate with Audio Techs and Stage Hands to manage sound levels throughout the event
- Troubleshoot and address any audio issues in real-time during performances

Time Commitment

- Pre-festival: Setup and sound check
- Festival shifts: 8-hour shifts, primarily during performance times
- Post-festival: Assist with equipment teardown
