

Technical Production / **Audio Techs**

Purpose

Audio Techs ensure that the festival's sound system is set up and operated to deliver clear, high-quality audio throughout the event. Their role is essential in creating an immersive experience for both performers and attendees, ensuring all audio elements run smoothly.

Tasks & Responsibilities

- Set up, operate, and maintain sound equipment, including microphones, speakers, and audio mixers
- Work closely with Audio Mixers, Video Techs, and Stage Hands to coordinate sound needs for performances and workshops
- Troubleshoot any audio issues that may arise during the event
- Ensure sound levels are balanced and clear for all performances and events

Time Commitment

- Pre-festival: Equipment setup and testing
- Festival shifts: 4-hour shifts, scheduled throughout the festival to cover multiple performances
- Post-festival: Assist with teardown and equipment packing
