

Technical Production / 💡 **Video & Light Techs**

✨ **Purpose**

Video & Light Techs manage all aspects of visual production, ensuring high-quality video and lighting setups for performances, workshops, and other festival activities. Their work enhances the visual experience, supporting performances and creating a dynamic atmosphere.

🔧 **Tasks & Responsibilities**

- Set up and operate video equipment such as projectors, screens, and video switchers
- Manage lighting systems, including DMX controllers, to create visual effects that complement performances
- Work in collaboration with Audio Techs, Audio Mixers, and Workshop A/V teams to ensure smooth operation of both visual and audio systems
- Troubleshoot and resolve any video or lighting issues during the festival

🕒 **Time Commitment**

- Pre-festival: Equipment setup and testing
- Festival shifts: Shifts aligned with workshops and performance times, including long crew prep
- Post-festival: Assist with teardown of video and lighting equipment
